Rolevet

World Class Industrial Fasteners

Our VISION...

To be the global supplier of choice for specialist industrial forgings, fixings and fasteners

World Class Industrial Fasteners

We manufacture and supply hot forged and bar turned special fasteners to meet the needs of a diverse client base which spans a range of industries including the MOD, turbine manufacturers, power stations (nuclear and fossil fuelled), pump & valve manufacturers, oil & gas, chemical refineries, process plants, heavy engineering and ship repairs across more than 40 countries.

Worldwide Supply

With products manufactured to international fastener standards and a dedicated export team on hand to deal with international enquiries, we are fully prepared to provide any necessary documentation, letters of credit and can deal with multiple currencies.

24/48 hour breakdown service

Rolevet operates a breakdown service to meet urgent customer requirements and help minimise disruption in the event of an emergency.

Bespoke commissions

Our experience and on site manufacturing capabilities make us ideally placed to work with clients to develop bespoke industrial fastener solutions to meet their unique needs. We can work from customer drawings or reverse engineer from samples supplied, whatever industry you're in and whatever the application.

Materials

All grades of Stainless Steel	ASTM A453 660 A,B,C,D	Nickel 200, 201
Duplex UNS S31803	Monel 400, K500	Incoloy 825
Super Duplex UNS S32760	Inconel 600, 625, 718	Carpenter 20
Super Duplex UNS S32750	Hastelloy C276, C22, B3	Zirconium
Super Duplex UNS S32550	Titanium Gr2, Gr5, Gr7	

Products

Studbolts and Nuts	Socket Setscrews
Hexagon Head Bolts and Nuts	Clamping Systems
Socket Cap Screws	Full Nuts
Engineers Studs	Lock Nuts
Hexagon Nyloc Nuts	Washers
Socket Countersunk Screws	Offset Head Bolting
Slotted Machine Screws	Cap Nuts
Waisted Studs	Ferry Head (12 Point) Bolts
Tensioning Assemblies	Machined Parts
Bolt, Nut and Washer Assemblies	Shafts and Couplings

On–site Manufacture

With extensive manufacturing facilities that include hot forging, CNC and a general machine shop we are able to efficiently manufacture special industrial fasteners and threaded precision parts.

All of our products are finished to our own exacting standards and can be etched with part, drawing issue and cast numbers for ease of identification.

To complement the quality of our products we can offer the following:
Full Traceability of material purchased
Non – destructive testing certification
High frequency hardening certification
Welding certification
Nitriding certification
Heat treatment charts

A reputation built on Quality & Trust

Established in 1989, Rolevet Ltd provides a truly global service; supplying special industrial fasteners to international clients in the manufacturing and trade industries. Our trustworthy approach to business combined with quality products and a commitment to meeting customer requirements and delivery schedules – no matter how large or complex – has seen us develop an enviable reputation.

This, in turn, has seen Rolevet establish a diverse and loyal customer base that spans a range of industries including the MOD, turbine manufacturers, power stations (nuclear and fossil fuelled), pump & valve manufacturers, oil & gas, chemical refineries, process plants, heavy engineering and ship repairs.

Rolevet are accredited with BS EN ISO 9001, BS EN ISO 14001 and BS OHSAS 18001. We are also FPAL and JQS approved suppliers.

Experts in our field

Over the years we`ve worked on countless complex projects where we have had to work with clients to develop special industrial fasteners that are suitable for the unique environment in which they will be required to function.

This makes us well placed to manufacture fasteners used in the most hostile applications, from materials and methods best suited to the job ensuring that the finished product meets the relevant national or international standards.

To discuss how we can make a real difference to your project call us today:

On Site Hot Forging Facility

Size Range

6 mm Ø (¼") up to 75 mm Ø (3")
38.1mm (1 ½") up to 840 mm (33") Long

Material Capability

We are experts in the Hot Forging of specialist materials:

- *Inconel*
- *Stainless Steel*
- *Duplex*
- *Titanium*
- *Hastelloy*
- *Nimonic etc*

Product Capability

We have tooling available to forge the following:

- *Hexagon Headed Bolts*
- *Flange 12 Point Bolts*
- *Socket Head Capscrews*
- *Hexagon Flange Bolts*
- *Countersunk Headed Bolts*
- *Button Headed Bolts*
- *Various type of Nuts etc.*

We can forge to all international specifications and to customer bespoke requirements
